

MOHAMMED BARI

Buffalo, NY | Ithaca, NY | 716-335-6319
mb2753@cornell.edu | [linkedin.com/in/mdbari](https://www.linkedin.com/in/mdbari)

Education

Cornell University, College of Arts & Sciences

Candidate for Bachelor of Arts in Computer Science

Ithaca, NY

August 2023 – May 2027

Relevant Coursework: Linear Algebra, Data Structures & Algorithms, Discrete Math

Intro to Machine Learning, Computer System Organization and Programming, Introduction to Analysis of Algorithms

Programs: MLT Career Prep Fellow, SEO, Citadel Invitational Terminal (Summer 2024), ColorStack

Technical Skills

Programming Languages: Python, Java, C, Go, SQL

Technologies/Frameworks: React.js, NumPy, Pandas, Matplotlib, Scikit-learn, Kubernetes, Kafka, Snowflake, Git

Experience

Datadog

Incoming Software Engineer Intern (Go & Python Tools)

New York, NY

June 2026 – August 2026

Capital One

Data Engineer Intern

McLean, VA

June 2025 – August 2025

- Programmed automated analytics dashboard for YACC metric across internal/supplier call sites on Servicing Strategy Monitoring and Analytics team, utilizing Python through Pandas and Shiny libraries, Matplotlib, and SQL via Snowflake.
- Used SQL data analysis, discovered discrepancy between international and domestic call centers regarding callback and transfer rates, and proposed training program to decrease call time by 10%.

Sponsors for Educational Opportunity

Tech Developer Fellowship

Remote

June 2025 – August 2025

- Completed 300+ hours of CS/software engineering training on data structures/algorithms & full-stack web development.
- Gained software development skills by working in SCRUM-like teams to design, test, and implement full-stack applications using Python (Flask), MySQL, HTML, JavaScript, CSS, API integrations, and Git.

Cahill Tech

Software Engineer Intern

Buffalo, NY

June 2024 – August 2024

- Designed Metabase dashboards via SQL by filtering 50,000+ rows of data to optimize real-time analytics in graph/chart format.
- Engineered a customer facing React.js web page that implemented efficient category based tracking of educational modules, replacing filter-dependent navigation, which led to a 20% reduction in load time.

Projects

CardNest | *Flask, Bootstrap, JavaScript, Firebase*

August 2025

- Programmed full-stack website with Flask backend and JavaScript frontend that allows consumers to upload CSV bank statements and credit cards for real-time expense tracking and cashback/credit card recommendations with Gemini API.
- Utilized Bootstrap templates for web pages and Firebase on backend for user login authentication.

FinTrack | *Flask, PostgreSQL, React*

September 2024 - December 2024

- Built financial tracking website on project team that summarizes expenses and tracks budgeting efforts via CSV bank statements by creating expenses table, showing expenses categories, and alert overspending.

AI Earnings Call Summarizer | *React, MongoDB, OpenAI API*

February 2024 - May 2024

- Built AI earnings call web app that inputs recording of company earnings call and transcribes it, utilizing OpenAI API call.

Leadership / Extracurricular

Cornell Wardrobe

Tech Lead

Cornell University

September 2024 – Present

- Led weekly maintenance of club website by updating team headshots, events & recruitment timeline with React.js & Typescript.
- Manage team of 6 software engineers, organizing weekly meetings & acting as liaison between club e-board and tech team.

Cornell FinTech Club

Financial Software Engineer

Cornell University

February 2024 – Present

- Program numerous fintech service apps/websites with 5 sub-team members at weekly meetings with MERN stack.
- Designed & presented PowerPoints to show project progression at monthly meetings & held recruitment events such as interviews.

Interests

Basketball, Football, Soccer, Weightlifting, UFC, DC Comics, Old Cartoons, Video Games, Animal Documentaries
